

REMARKS

Please deduct the \$55 extension fee from Applicant's attorney's Deposit Account No. 23-0120.

In response to the Office Action Applicant amends Claims 6-11 and 23-29 to recite the method of providing a plurality of hardened foam roofing panels, applying a layer of a rising foam adhesive to a pre-determined surface of a roof to be covered, placing a first hardened foam roofing panel of the plurality of hardened foam roofing panel upon the rising foam adhesive upon the roof to be covered; each the hardened foam roofing panel has a top surface, a bottom surface, and at least one indented periphery; the top surface having an integral layer of fabric bonded to the hardened foam roofing panel; mating the at least one first periphery of the first hardened foam roofing panel to a further hardened foam roofing panel upon the layer of rising foam adhesive applied to the predetermined surface of the roof, the further hardened foam roofing panel having at least one further indented periphery, the at least one first indented periphery of the first hardened foam roofing panel being larger than the at least one second indented periphery of the second hardened foam roofing panel, thereby preventing a tight fit between the at least one first indented periphery of the first hardened foam roofing panel and the at least one second indented periphery of the second hardened foam roofing panel, and, fitting the at least one first indented periphery and the

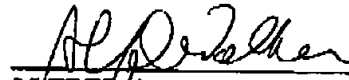

at least one second indented periphery loosely together with a gap provided between the first hardened foam roofing panel and the at least one second hardened foam roofing panel, allowing the rising foam adhesive to rise within the gap therebetween. It is believed that neither Paquette nor Deibel of the cited art anticipate or render the amended Claims obvious.

No new matter is introduced by the foregoing amendment.

It is believed that the Claims are allowable.

Respectfully submitted,

Dated: November 30, 2004
